

PROFILE SEBASTIAN

Sex:	Gelding
Foaled:	May, 2008
Sire and/or Dam:	Unknown (Dam: rescued mare named Bella, no papers)
Breed:	Unknown
Statistics: <ul style="list-style-type: none">• Height:• Weight:• Color & markings	14.2 hh 750 lbs Dark Brown
Health Background: <ul style="list-style-type: none">• General condition• Shots/vaccines/worming• Hoof care• Teeth	Excellent UTD on shots and wormed Not shod; UTD on trim; N/A
Riding condition:	Started but green-broke only
Temperament:	Fair

Sebastian was born shortly after his mother Bella arrived as a rescue from Plain, Wash. He is one of five foals born at the ranch and knows only Trusting Spirit as his home.

Sebastian has undergone intermittent training for approximately 18-months, however can only be categorized as green-broke. He has a lot of energy, is good with people and other horses. He shows willingness and improvement with his ground work. But his riding experience and exposure to new situations has been limited. Given this, he would require an advanced and experienced horse-person to finish his training and help him gain more confidence carrying a rider.

Additionally, given his size his rider would need to be smaller in stature.

PROFILE BLUEBELL

Sex:	Mare
Foaled:	Unknown; (estimated age: 18 y/o)
Sire and/or Dam:	Unknown
Breed:	Paint; (no papers)
Statistics • Height: • Weight: • Color & markings	15+ hh 1100 lbs Sorrel with bald face; blue right eye; white pastern on back right leg
Health Background: • General condition • Shots/vaccines/worming • Hoof care • Teeth	Good (<i>see notes below on back tendon injury</i>) UTD on shots; recently wormed Not shod; UTD on trim; Not floated since arriving at the ranch 11/13
Riding condition:	Broke; well trained; can carry a rider confidently, neck reins, responds to leg pressure and verbal queues
Temperament:	Good; likes having a job; confident

Bluebell came to Trusting Spirit in November 2013 as part of a rescue/seizure effort out of Spokane, Wash. She has a confident personality and appears to have had some advanced training. She is good with people and does well with ground work, but could use some refresher handling to get her back in shape. She has some alpha mare traits.

She has a permanent tendon injury in her back left pastern so can't be ridden hard or for long periods. Given this condition, she would be best suited for a smaller, lighter framed rider or for use as a gentle learning horse in the right setting. Interested individuals would need to agree to follow the required and proper care for her back leg before being approved for adoption. She has no other health issues beyond the back pastern injury.
